

TAC - Hướng dẫn Upgrade Wifi TPLink sử dụng Firmware DD-Wrt

Firmware thường sử dụng được đặt tại Link sau: <http://tac.sctv.com.vn/projects/tac/files>

Firmware gốc tại link sau: <https://dd-wrt.com/support/router-database/>

Bước 1: Kiểm tra Hardware Version của Wireless Router phù hợp

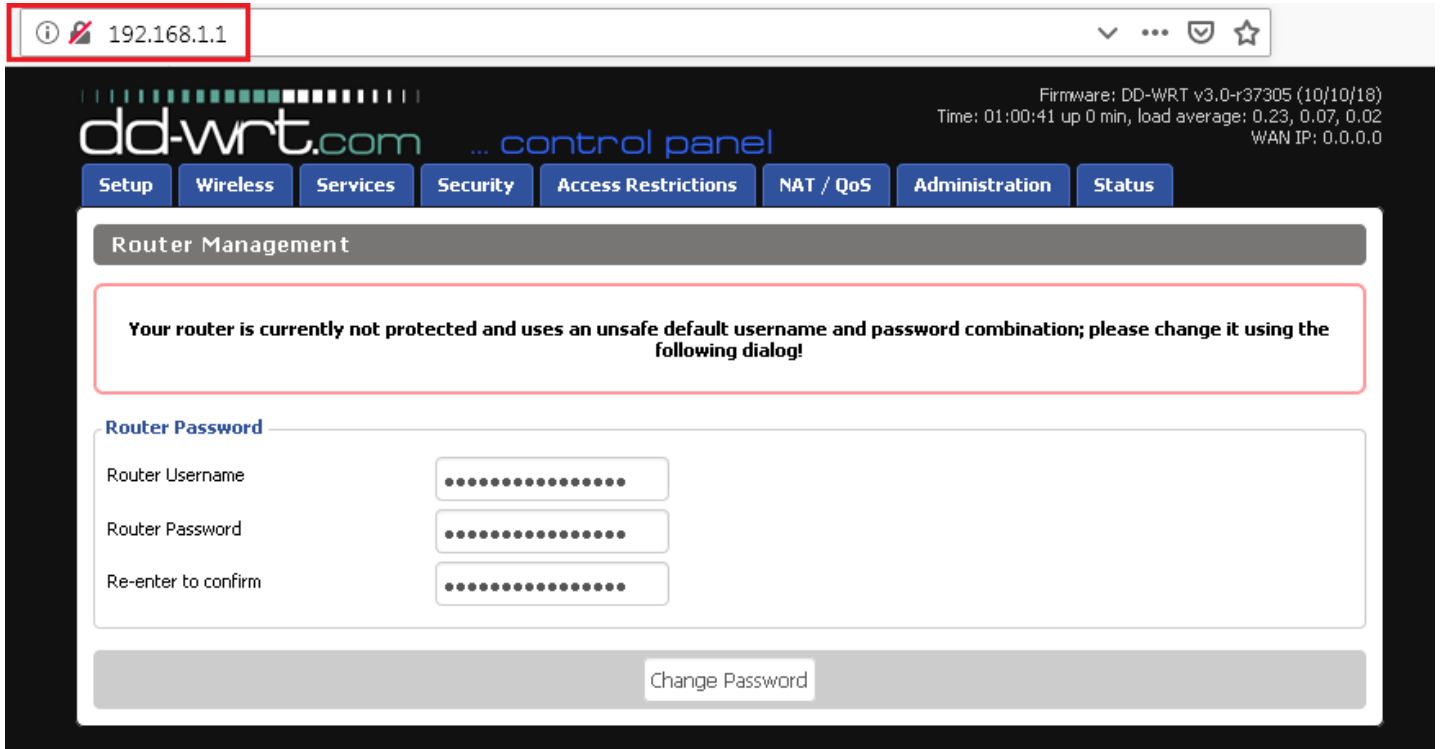

Bước 2: Chọn File "factory-to-ddwrt.bin" và Upgrade

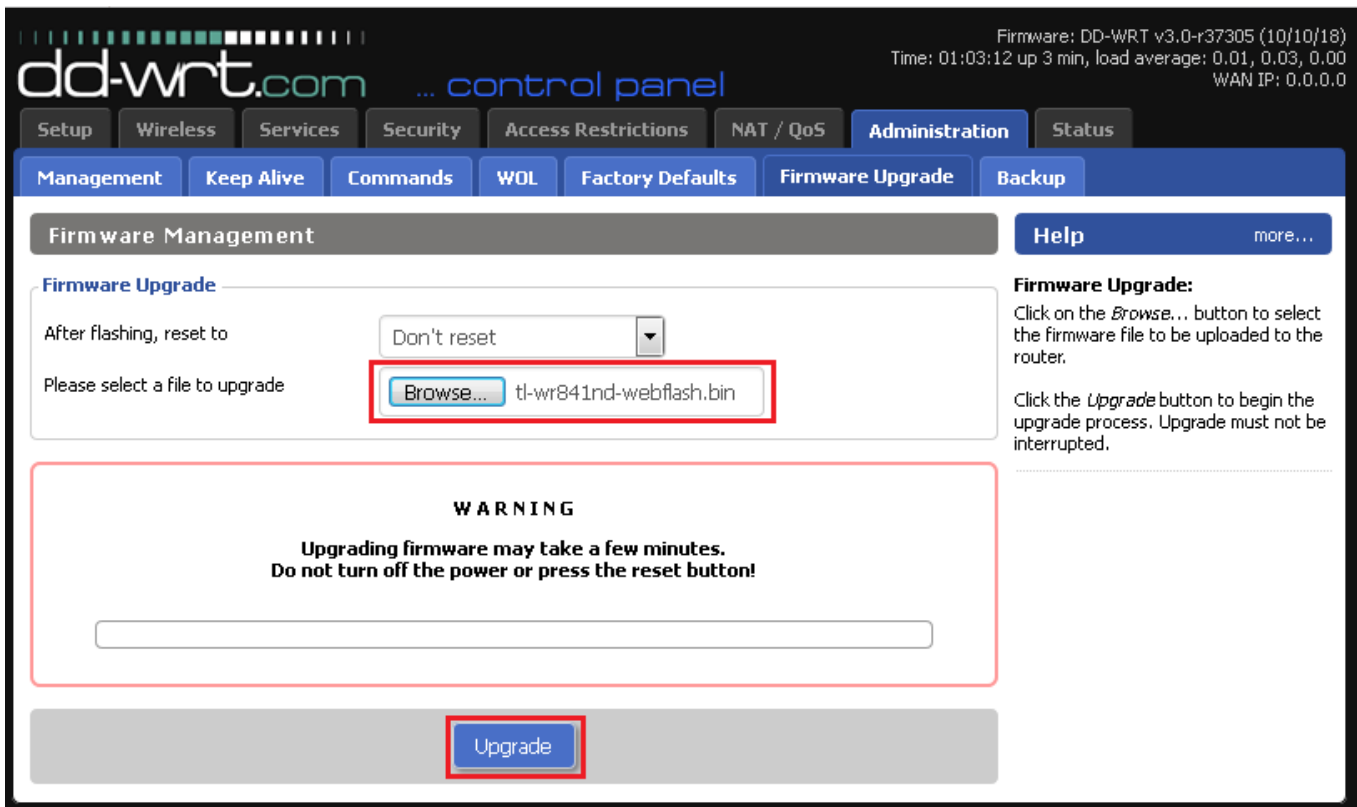

Bước 3: Không reset Power

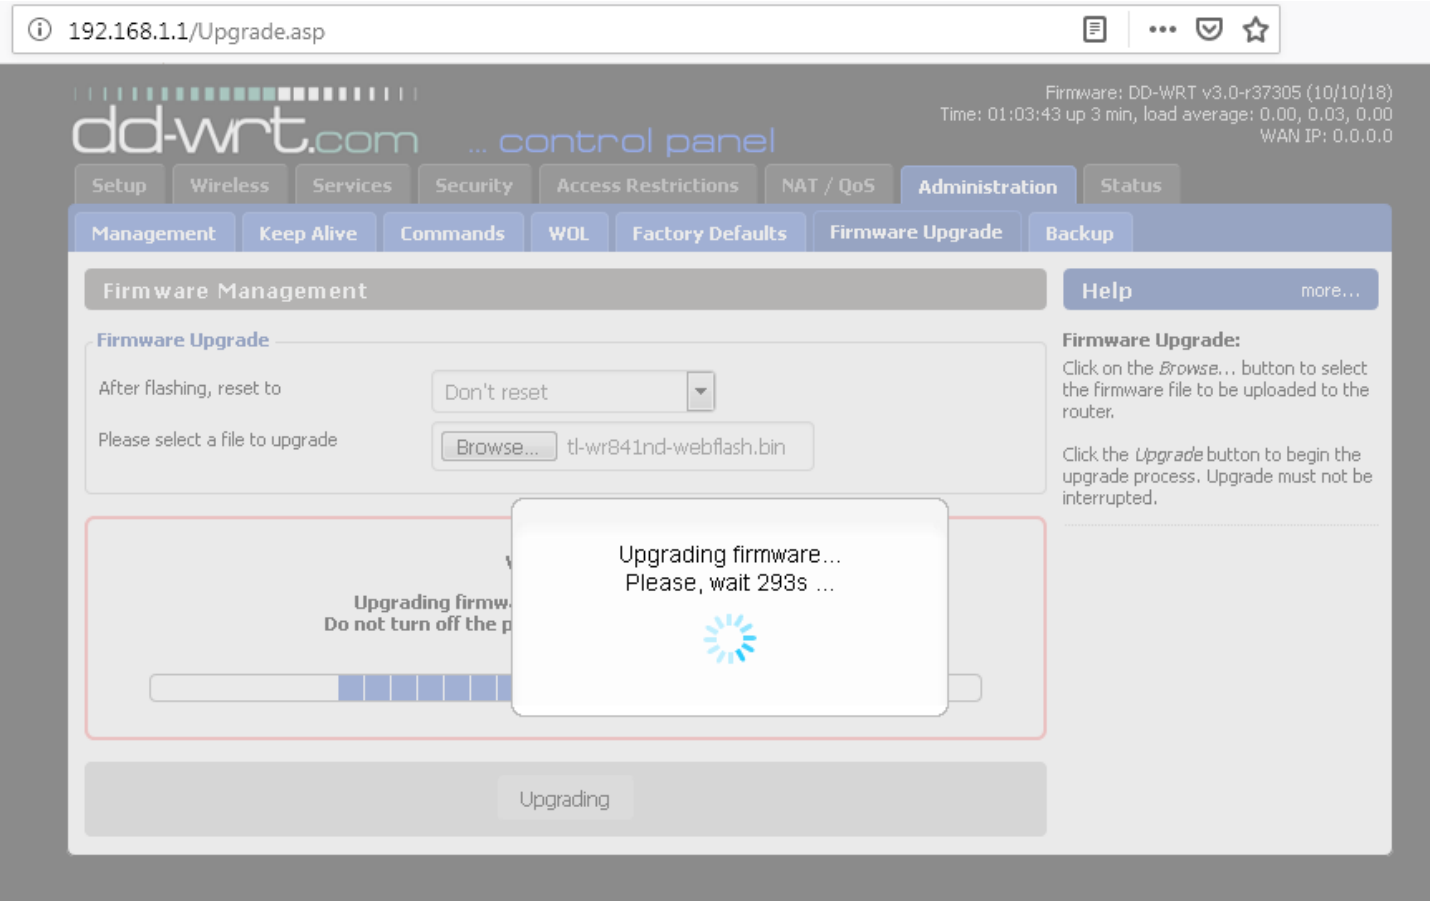

- Sau 300s thay đổi local IP = 192.168.1.1 để vào giao diện mới của WR
- Account login nếu có = admin/admin

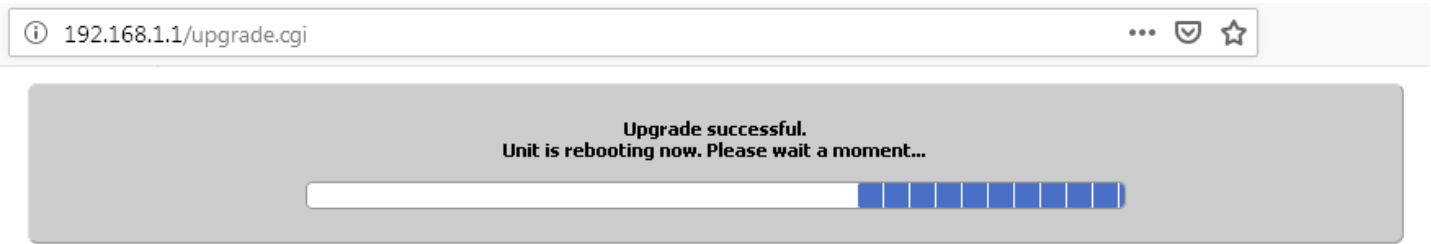

Bước 4: - Administrator => Firmware Upgrade
- Chọn file "tl-wr841nd-webflash.bin"
=> "Upgrade"

Bước 5:

và

Bước 6: Kiểm tra Administrator => Management => Cron => Enable
